

**Making followers of Jesus.
Helping communities thrive.**

Community Health Evangelism (CHE)

www.CHEnetwork.org

Transforming lives and Communities through the seamless integration of evangelism, discipleship, disease prevention, and community owned development

The CHE Strategy

Community Health Evangelism (CHE) is a wholistic ministry strategy that seamlessly integrates evangelism, discipleship, and church planting with community health and development. Through CHE ministries, people become followers of Jesus, and whole communities are lifted out of cycles of poverty and disease.

The CHE Purpose

The purpose of CHE work is to exalt Christ and reflect the values of His kingdom in every aspect of life. We seek to be obedient to everything Christ commanded, including both the great commission and the great commandment (Matthew 28:19,20; 22:36-38). Church planting, disease prevention, and poverty alleviation are all intended outcomes.

CHE Training Materials

The CHE CD contains a large collection of simple participatory lesson plans that CHE workers can use to equip and mobilize communities to solve their own problems using local resources. CHE materials cover a broad range of transformational development topics including disease prevention and health promotion, poverty alleviation and economic development, social harmony and spiritual life. The latest lesson plan disk contains more than 10,000 documents including lesson plans, stories, picture books, teaching aids, surveys, and tools for monitoring and evaluation.

The Global CHE Network

The Global CHE Network (GCN) is an association of people and organizations working together to strengthen each individual ministry and expand the CHE movement. Network members from more than 650 different organizations in 126 countries share useful ideas, encourage each other, and coordinate their efforts to optimize the use of limited resources. For more information about the network, go to www.chenetwork.org.
